

Pokemon Type Changes

HeartGold Generations v2.2

The v2.0 type-balance table remains unchanged in v2.2.
This edition is stamped and reviewed as the v2.2 reference.

Pokemon Type Changes

I did not want to buff pokemon stats, as I think some pokemon need to fill specific niches/early game pokemon etc. However, many pokemon have boring or forgettable types, and prevent anyone from really wanting to use them despite having cool designs.

These are type changes that I think *will make the pokemon more fun*. Do I actually think they should make Blastoise Water/Steel? No. Should Luxray, the GLEAM EYES Pokemon, who is all about LIGHT, be a Dark type? No. But it makes the pokemon more unique and makes use of unused or rarely used typings.

Pokemon	New Type	New Moves	Logic
Meganium	 	Draining Kiss, Moonblast	Meganium is fairly weak, and giving it Fairy and Triage makes it more interesting.
Typhlosion	 	Mud Slap, Mud Bomb, Earth Power	Typhlosion is a badger/hedgehog, which screams ground type.
Feraligatr	 		Feraligatr has a fairly sinister and aggressive design and learns loads of Dark moves already.
Blastoise	 	Metal Claw, Flash Cannon	Steel guns on his back, unfair that he is the only mono-type Kanto starter.
Arbok	 		Forgettable and weak, Arbok is a common villain in the anime and Dark makes him less trash.
Ninetales	 	Disarming Voice, Moonblast	Counterpart to Alolan Ninetales, plenty of Mono-Fires already. Also this is a canonically completely unused combo which is crazy.
Parasect	 	Shadow Claw, Astonish, Shadow Sneak	Parasect sucks normally, fits the ghost theme perfectly, and gives an actual usable non-gimmick Ghost/Bug other than Shedinja.
Venonat/ Venomoth	 		Too many Bug/Poisons, learns loads of Psychic moves already, and it's a rarer typing.
Ponyta/ Rapidash	 	Spark, Zing Zap, Wild Charge	Rotom restricted type, Rapidash is forgettable normally, I think Electric is cool to represent its speed.
Doduo/ Dodrio	 	Mud Slap, Bulldoze, Drill Run	Forgettable Normal/Flying, fits Ground/Flying as a running bird, and a counterpart to the "sandy desert" vibes of other ground/flying types with a more literal ground type.

Electivire	 	Mach Punch, Power Up Punch, Close Combat	Plenty of mono electric types, feels fitting for the design and Electric/Fighting is pretty rare.
Magmar/ Magmortar	 	Bubble, Scald, Surf	Gonna be controversial, but no one cares about a mono fire type like Magmortar (except me) and he's already a fire duck. Such a cool typing that's exclusive to a mythical, I've always wanted all starter type combos to be available for normal pokemon.
Noctowl	 	Ominous Wind, Shadow Ball	Normal Flying is overused, and Noctowl is a very fitting ghost type, plus Drifblim is the only regular Ghost/Flying line (Oricorio doesn't count)
Ledyba/ Ledian	 	Drain Punch	Ledian is ass. It needs this
Ariados	 	Night Slash, Bite	Bug/Dark is surprisingly rare, and Ariados is forgettable trash without something to make it more unique
Sunflora	 	Ember, Flamethrower	Common change, but again I just love starter type combos and Sunflora needs something to make it more unique
Yanmega	 	Dragon Breath, Dragon Pulse	More Bug/Flying spam. It's a dragonfly for gods sake, and Dragon/Bug is unused canonically
Mismagius	 	Fairy Wind, Moonblast	Ghost/Fairy is an awesome type, makes Mismagius more fun to use imo
Granbull	 	Bulldoze, Earthquake	Fairy/Ground is unused and I wanted to give it to someone since it sounds cool. Granbull is the only pokemon I feel it fits <i>okay</i>
Sceptile	 		Another starter that missed a second typing for some reason, just takes the type of its mega
Dustox	 		Dustox is super forgettable imo, makes it more unique
Masquerain	 		Adds a specially favored Bug/Water type, and Masquerain is once again Bug/Flying slop
Nosepass/ Probopass	 		Rock/Electric is rare, and this gives a special attacking representative. I think Electric feels more magnetism related than Steel does anyways, which is this lines theme

Delcatty	 	Play Rough	Wow Delcatty is turbo trash. Normal/Fairy at least fits its vibe and gives it a better type
Flygon	 		Common change again, and controversial, but I just think its a more interesting type when Garchomp exists. I don't even have to give it Bug moves it already has so many
Altaria	 		Just takes the mega type, and makes a regular non-mega Dragon/Fairy exist
Milotic	 	Dazzling Gleam, Draining Kiss	Meant to be a Gyarados counterpart, feels like it should get a second type to be more balanced. And it's heavily beauty focused, so I mean come on
Banette	 	Scratch, Crush Claw	Super rare type, Banette isn't very good so this makes it more unique.
Glalie	 	Accelrock, Rock Slide (TM)	Ice/Rock is a bad type combo, but Glalie gets left in the dust by Froslas. Idk I think he fits Rock
Luxray	 		bro really made luxray Electric/Dark
Rampardos	 	Rock Smash, Brick Break, Collision Course	Why does Bastiodon get a second type? Rock/Fighting is only on Terrakion surprisingly, so seems fun for Rampardos
Lopunny	 		Copies the mega type, it seems fitting
Galarian Yamask	 	Ancient Power, Power Gem	Rock/Ghost doesn't exist at all which is crazy, why was this guy made Ground type??? I also swapped his Attack and Special Attack to make him more interesting from Cofagrigus and make him a special attacking Rock type
Beartic	 	Rock Smash, Brick Break, Power Up Punch	Ice/Fighting is only on Crabominable, makes Beartic feel more unique, fits his design
Cetitan	 	Poison Sting/Poison Jab	Another unused type, I want to include it somewhere and these guys have purple and spikes on them, good enough for me
